

delivering what we promise •

# Your Heat Exchanger Specialists since 1977

Maritech Group is a world-class spare parts provider and repair specialist offering cost effective solutions that improve reliability and maximize efficiency

We make plates, gaskets and other components for marine and industrial heat exchanger applications and parts for fluid handling equipment such as ejectors, housings, shafts and impellers.

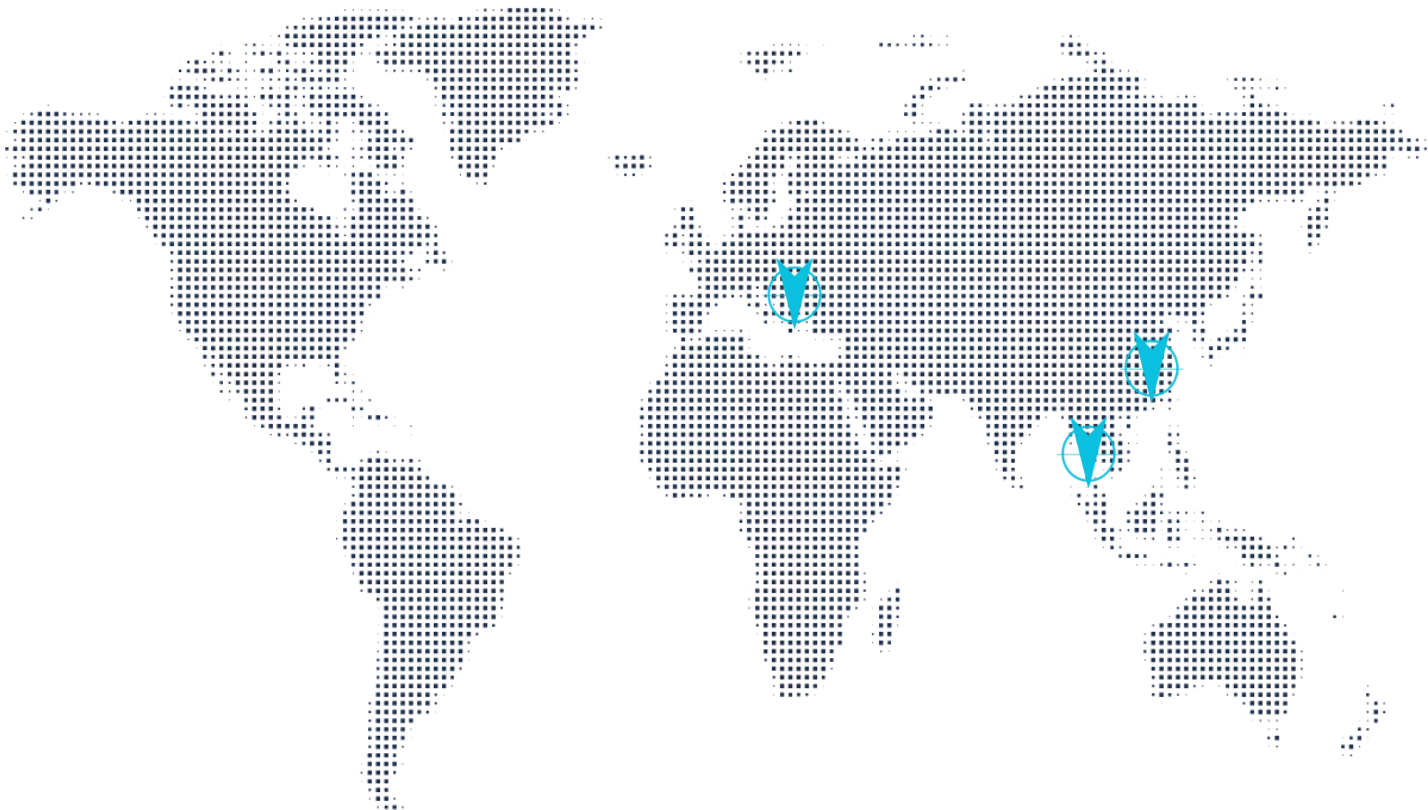

Maritech brand reflects our all-inclusive after sales support for our entire product portfolio. Via a fully equipped service center and flying teams manned with highly trained engineers, Maritech provides **24/7 service, anywhere around the world** including technical support, maintenance, repair and troubleshooting for any plate heat exchanger type, size & make.

## The Global Presence of a Constantly Expanding Network

Hong Kong | **Headquarters**

Piraeus | **Operations & Service Hub**

Singapore | **Operations**

# Shaping the Future

Looking ahead to the future, always remembering where we came from

We started in a small workshop and managed to have operations around the world. From our very beginning, our commitment has been setting industry-leading standards in all measures of business performance, seeking **continuous improvement in everything we do**. We learned our lessons, improved and grown. This is our story.

## 50 Years of Excellence

1977

Company was established by its founder Anastasios Sorokas as **Sorokas SA** in Piraeus, Greece

1990

Company is renamed **Sorokas Group SA** and expands in Mangalia, Romania

2004

Company is renamed by Dimitrios Sorokas as **Maritech Group** and specializes in Plate Heat Exchangers & Fresh Water Generators turnkey solutions

Manufacturing facilities, 2000 sqm warehouse, service station and R&D center established in Piraeus

2012

**Maritech Global** is established in Singapore, new warehouse facilities in China and sales operations are expanded in Croatia

2021

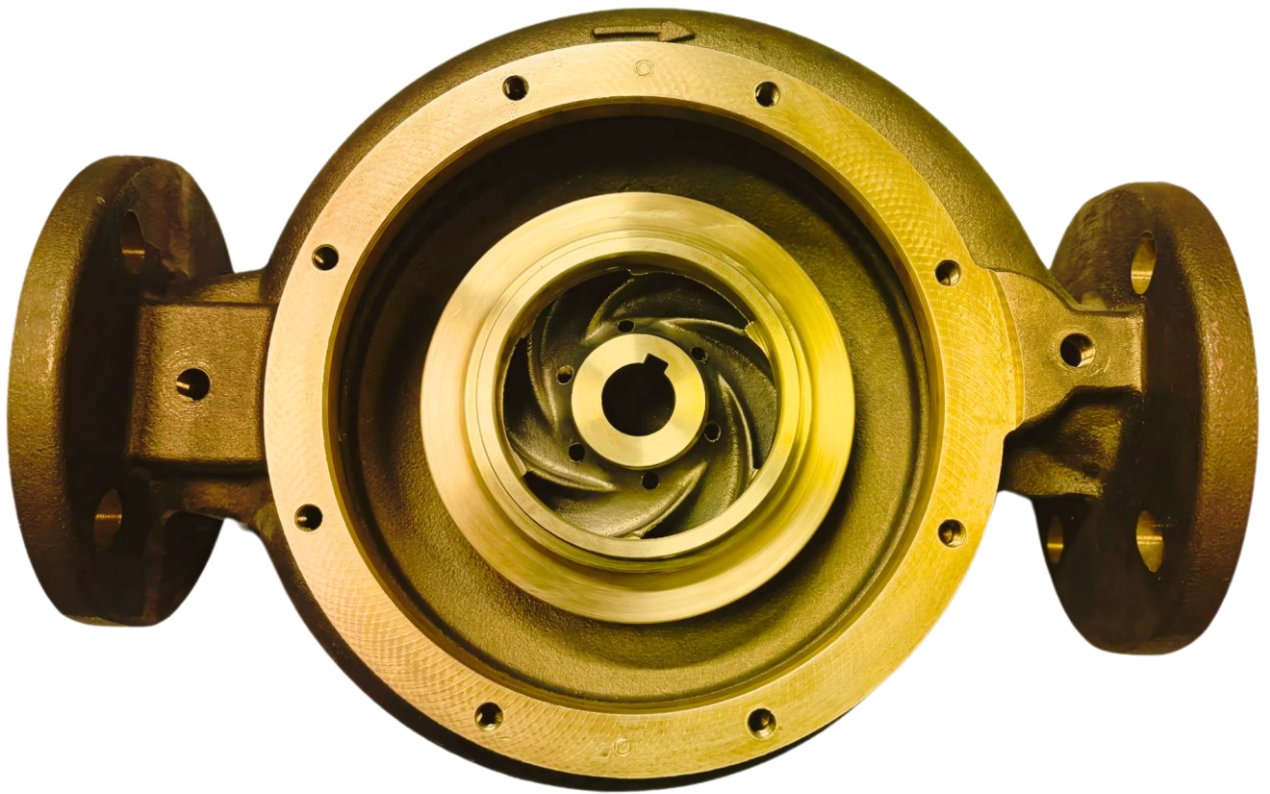

## Our Legacy Brand

Maritech offers technical expertise for heat exchangers and fluid handling equipment

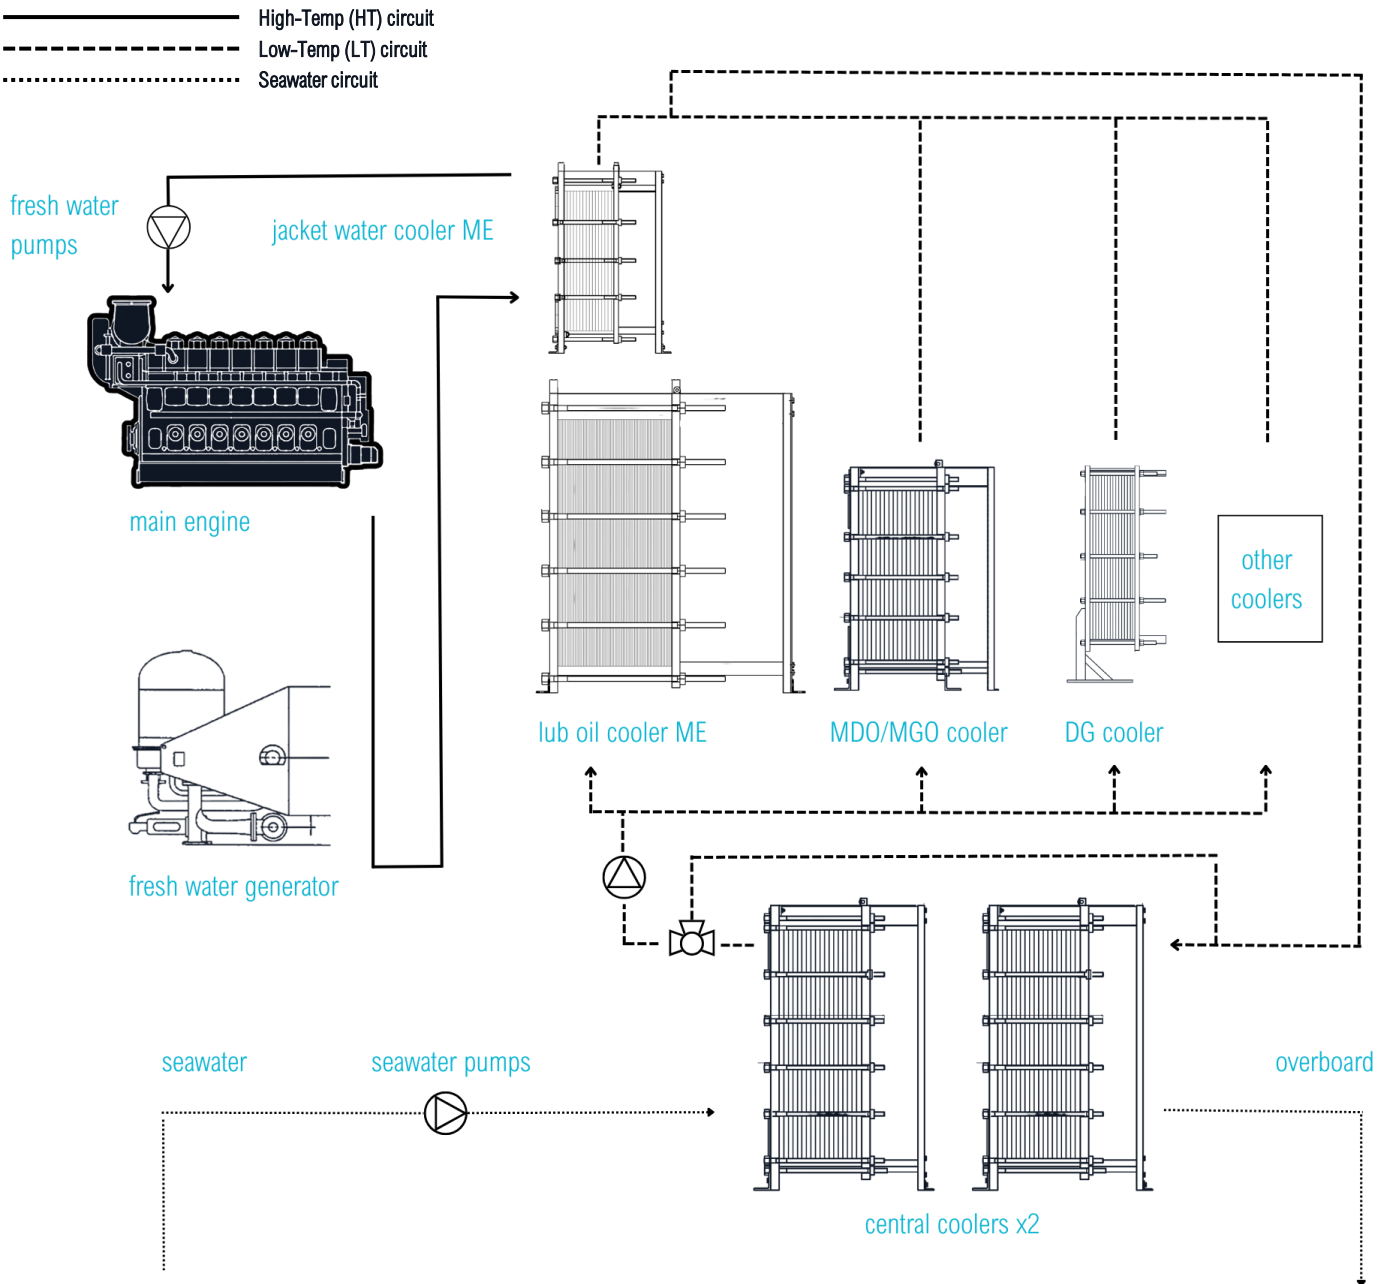

Our brand strategy has been always communicating our engineering-oriented character and passion for precision, innovation and best customer service. We deliver brand trust through our specialization business concept and our **all-inclusive after sales process**. Every day we keep our promise by ensuring that every product and service can be trusted for both quality and safety.

# Integrated Solutions for your Fleet's PHE Requirements

Whatever your plate heat exchanger, we have a tailor-made solution when you need it

Almost every system onboard ship depends on heat exchangers, where the fluids are either cooled or heated. No matter the maker, type, age and size of vessel's equipment, our solutions are **designed by marine engineers for marine engineers**, capable to cover multi-brands and to improve reliability, extend lifetime and lower OPEX, anywhere around the world, anytime.

# Spare Parts Services

Ensure that you always have the right part at the right time

Guarantee that you chose premium quality. Based on our in-depth knowledge regarding the specifications of your equipment, we offer our own original brand as well as improved replacement options for a variety of brands. Maritech provides complete overhauling schemes on a turnkey basis, **undertaking the responsibility** for the supply and installation of your spare parts.

## Spare Parts Explained

Maritech's portfolio ranges from critical to wear-and-tear parts, and from overhauling kits to 3D scanning and remanufacturing of obsolete components.

All parts are manufactured in accordance with Maritech's guidelines and inspected to ensure compliance to strictest quality requirements. We strive daily to improve design techniques and research for new materials to produce better products with a reduced carbon footprint.

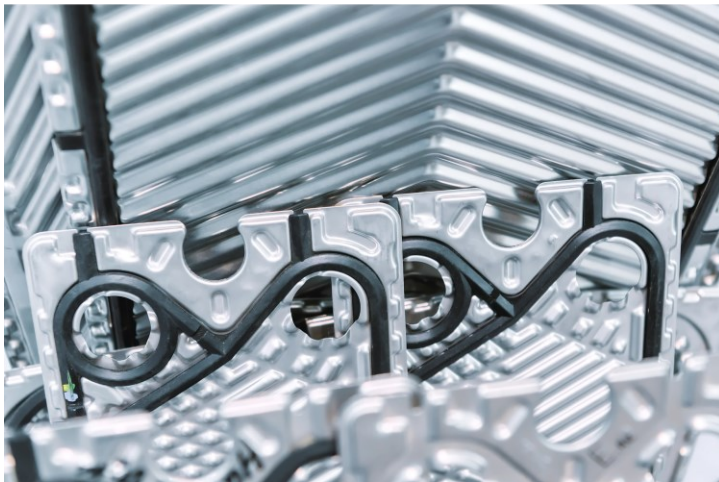

## Why Choose Spare Parts from Maritech?

A main reason for which customers select Maritech, is not only the reliability assurance and risk avoidance they enjoy, but also for the support they experience throughout the whole acquisition process; from part identification, to fast and accurate delivery, and up to the active support throughout their equipment's lifecycle.

Maritech is a customer-driven supply chain enabler, currently operating two strategic spare part hubs in Greece and China, stocks hundreds of critical components and invests in emerging technologies aiming to increase customer proximity and satisfaction.

Whatever your requirement may be, contact a Maritech expert to discuss about the tailor-made solution that is best fitting for you.

## Genuine Performance, Lower Costs

# Maintenance & Repair Services

Servicing and troubleshooting of heat exchangers is our specialty

Maritech offers a full range of heat exchanger services designed to enhance performance and reliability throughout the whole lifecycle of your equipment.

Maintenance requires in-depth knowledge of the specifications of each equipment. Maritech has the technical expertise to provide **qualified services for any brand, type, size and age** of heat exchanger, anytime, worldwide.

## Services Tailored to your Needs

We offer services to meet the unique needs of each of our customers. We combine technology with technical competency to optimize your equipment's performance and reliability.

Whether in-house, during dry docking or onboard during sailing, we have highly trained teams ready to support you, 24/7, worldwide. Service agreements are designed to provide you assurance throughout your equipment's lifecycle, without downtimes and within budget.

## Repairing is Better than Replacing

Through our refurbishment program of your own equipment, you can reduce your ownership and operations costs, achieve maximum service life of your equipment without compromising reliability.

## Manufacturing as a Service

We aim to improve supply-resposiveness and are now launching on-demand manufacture based on samples, obsolete parts and drawings.

# Industries we Serve

Delivering premier plate heat exchanger solutions for multi-industries

At Maritech, we offer world-class products and services for heat exchangers and fluid handling equipment and are proud to be the **preferred partner** for customers **among different industries**.

## Maritime

Bulkers, Tankers, LNG, LPG, RORO, Containerships, MPP, Heavy Lift, FPSO

## Industrial Plants

Oil & Gas, Utilities, Mining, Food, Agricultural, Pharma

## Yachts

Mega yachts

## Shipyards

Major to small Shipyards, Repair Yards, Service Stations

# Sustainability

Creating substantial value for our stakeholders

We approach and implement sustainability initiatives in alignment with our business values and principles by developing a framework that ensures innovation fostering together with **responsible business practices**.

## Improving Together

People are at the core of what we do. We are empowering our personnel to learn with and from each other, obtain new skills and diverse thinking, and work as a team to innovate and shape an inclusive and sustainable future.

## Climate & Environment

We combine creativity with investments into emerging technologies to deliver better and more sustainable products and services. Parallel we work every day to minimize our own environmental footprint.

## Our Communities

We are driven by our purpose to offer world-class engineering solutions, create sustainable value and make the difference. We aim to grow our business in ways that build a sustainable world for the future generations and support our communities.

## Living our Values Everyday

We consistently conduct our business through responsible practices and ethical governance and are committed to a culture of integrity in our business and operations and to safeguarding a sound communication with our shareholders and stakeholders.
